About This Game

Perhaps one day you will find yourself in a strange land, alone and helpless. And in this world, your name is, Ayni.

There is only one kind of tool in each world and you even need to use this 1 tool to break through any challenge. In the bubble world, there are bubble generating agencies that you can use to float in the sky to complete all the challenges. In the hot world, there is a fire column switch, which is used to control the movement of walls and land, control the layout of the entire scene to pass through the levels. Different challenges reflect different principles, which inspire people to think about real life. As you constantly explore, the world will become interesting beyond imagination. Of course, there are dangerous and exciting challenges, Lords of element is difficult to deal with!

Every level looks small, but it takes you to activate your brain. If you are temporarily unable to pass through the level, you can open the tips in the game and you may be inspired. In a floating world, bubble generating devices can slow down the descent speed and protect themselves. the core challenge in the whole chapter is to design through bubbles. The core challenge of the flame world is how to use the switch. having fire can turn the switch on or off.

Various roles can be purchased in the store. ninja,bear man,eggshell gentlemen,future No.1,miku,and so on.

Key Features:
•Short but intricately designed levels.
•Unpredictable ways of passing the levels.
•You can do almost anything with one kind of trap, of course, it requires some imagination.
•Read in the level, learn how to do things in the challenge like.

•About roles, the types you like may be here.
•Play easy and wonderful music at random.

Ready and go!

Complete Rubbish. if u put time in to the game u will see most these people are not playing any hours to lern or no the game well to make a point. if they had played long they would had seen there iS A GPS stystem u have to buy for your truck then u will no were to go. all and all its a hell of a great game even if it cost a 100$ noing what I no about the game I would had payed and amount of cash for it. yup still 1 of my most favort game great replay abitly. I will aways come back to this game. for a cheap game it offers a lot. and is for most part changing game. I feel like a god then get my♥♥♥♥♥haned to me in a wreak. and lose every thing. this game is a classic u can bye trucks. and for most part I love most about that game is grind 1 more hour just so I can play the new truch with a diffrent driveing style. well 1 hour truneds into 24 hours with no food or sleep. this game also made me wont to bye a real truck in real life. and it maby me love truchs so much I spent some time learning about these trucks in real life. After purchasing Bitmap2Material 3 Professional Upgrade, I do not see "Professional" in my Library. I am not able to export SBSAR files. Is there some sort of install process or licensing key I need to apply? My library just says Bitmap2Material. It does not indicate that I have pro! This is very frustrating.. This is a very fun truck drivin' game,you can have a good time over the road and driving in a nice truck.But my problem is that the frieghtliner fld is super mesed up but that doesnt matter because the realism of this game is amazing.. A spooktacular game of mystery and evil perfect for halloween. Those new to mystery games will find themselves hitting the hint button alot, though the game is friendly to new players since any puzzle can be skipped or the hint button can be hit if stuck. Cant get lost because there is a map highlighting where an object of importance is to continue the story.

The Hidden Object Puzzles can be very difficult, there are things that can be moved on screen in the puzzles, meaning you just need to click everything to see what moves if there is an item behind it since there is no cursor change. Due to the games age many objects are difficult to spot due to them being very small or the detail is so low they cant be clearly seen. During puzzles it may ask to find a heart, or a knife, but there will be tons of hearts or knives meaning finding some arbitrary one. Other times objects are just named wrong such as saying "darts" but there are none instead there is a dartboard you click instead.

There are not many full on Halloween games on steam so this is worth trick or treating it up.
Rating: 7√10 Value: $2.99. A cross between a rail shooter and "The Lab"s Xortex; pretty good looking with reasonable detail and a cool space battle backdrop. It's good fun but it's also really hard.. I will say this upfront: if you are a hardcore Cricket fan, and if you enjoy the statistical side to the game, then you may end up liking this game. There are two core aspects to the game: selection of your team, and then setting fields and managing how aggressive your bowlers and batsmen are during the games themselves. You don't have any direct control over the players, so in many ways it's sort of a cricket match simulator. The amount of input you put into the game is quite minimal, so it feels like a casual game with a strong statistical emphasis. The main difficulty with the game is the selection process, as you don't have access to any attributes, aside from their statistical records in previous matches, which like a real cricket selector means you either have to choose based on gut instinct, or record over a period of time.
Whilst this simplistic style of game can be endearing, ultimately it's hard to recommend at this price, as the game has not fundamentally changed in over 15 years, and the incremental changes are hardly revolutionary. The graphics and UI are awful. The lack of a player editor to fix basic errors in details and ability means that to seasoned cricket fans the database will frustrate, as the game outside of England is not well scouted or balanced and don't often reflect real world abilities. I understand the decision not to include editor is because the game is so similar to previous editions; fans would be able to update them themselves and wouldn't spend the money. However, when the database is so fundamentally flawed, I cannot let it slide. If you haven't played this series before, it's well worth a look. If you have a recent edition, there's not enough new content to warrant the asking price.
. A better Mega Man clone than Mighty No. 9. Playing this game is like reading a book, meanwhile it has abundant illustrations and lifelike characters, and wonderful professional character voices and melodious background music make you personally "BE THERE". Players can through interacting with many different kinds of beautiful girls promote the development of the plot of the game, and need to be in the key link of the game branch to make the right decision , so that they can reach the perfect ending.

So boring. This game is ONLY hidden object puzzles. NO PLOT, no real scenery or progression of story except little video clips between puzzles. No voices, which in itself is not a bad thing, but in this game it just adds to the misery. Not my type of game.. LET THEM EAT HONEY 10\/10. Anime style side-scrolling bullet-hell shooter, great for those who really want a challenge.. Gr8, wish the backpack stayed.. DO NOT BUY THIS GAME UNLESS YOU HATE YOURSELF

First off the negatives.
My car (with a reliability trait) is lucky to make it through the race, 36 races in the season and my car finished 3 of them.
The field of drivers\/crew chiefs to choose from are all terrible, if I do finish the race it will be in 30th or worse.
Any car I R&D is much better than starting cars but still can't hang with the rest of the field and the cars dont progress stats.
Sound is waaaaaaaay too loud and is either on or off.
Can't modify car in any way, no parts, paint or decals.
Sponsors offer nothing but money, which is really only good for car repairs since my car is broke after every race.
Hire 4 drives and own 2 cars but can only run one of each per race.
Where do drivers and crew chiefs go after you cut them? what happens when there is no more?
Many more negatives but dont care to go on, game says I have 25 hours played.... I left it open for almost a full day.... I have never reviewed a game on steam but I felt like I had to on this one just to save someones money and sanity.

Positives.
I can play multiple seasons.
Thats about it.

I will keep this game in my library in hopes of months from now it become a real game and I can play it since I really like the concept, just wish it wasn't made by a 15 year old in 1996 that just learned how to make a website.
